“ New Discovery,  
New Inspiration ”

ESA KARYA ASIA

Sidoarjo, Indonesia, a bustling town with cultural charm.

Presentation title

ESA KARYA ASIA

# INTRODUCTION

We established Esa Karya Asia (ESA in short) in the small town of Sidoarjo, directly below Surabaya, Indonesia. Our journey began in 2015 with humble roots, initially focusing on supplying Core Modus Pte Ltd in Singapore. We started by crafting simple wooden trophies and sourcing quality products from Indonesia.

As the years unfolded, we blossomed into a bespoke trophy designer, specializing in crafting exquisite trophies from wood, acrylic, metal, and 3D printing technologies. In 2024, we embark on an exciting new chapter, extending our services to the thriving South East Asia market, eager to share what we had done and services that we can provide.

# WHY ESA?

- Access to sustainable materials at competitive prices
- Expertise and unique knowledge in product manufacturing
- Cost-effective production leading to competitive pricing
- Reliable partners for on-time and fast air deliveries at optimal prices
- Capability to handle both stock products and customized low-quantity orders
- Specialization in custom packaging boxes for any quantity
- Serving as a central point/hub for numerous Indonesian artisans and craftsmen

- 3d print trophies pages 13-15
- Metal trophies pages 16-17
- Acrylic trophies page 18
- Laser Engrave Services page 19
- Laser Cut Services page 19
- UV Print Services page 20
- Others page 21

# PINNACLE WOOD TROPHY

Behold this exquisite layered wood trophy, crafted to form three layers wood sourced sustainably from Indonesia. Its dimensions, at 250x80x80mm, showcase a perfect blend of form and function. With carefully designated spaces for logos and text, each trophy promises a visually stunning design.

In 2024, we proudly extended our repertoire by introducing more designs.

## 2024 LAYER WOOD TROPHY

In 2024, we proudly expanded our collection with five new designs inspired by the elegance of the Pinnacle Wood trophy, all crafted from sustainable wood.

Stella

Prominenia

Silva

Torrens

Futurus

# GRANDIS WOOD TROPHY

We introduce a new design crafted from sustainable wood, embodying a contemporary aesthetic with distinctive elements like a slanted top for logos and multiple facet cuts. The dimensions are set at 200x60x60mm, but customization options are available to suit different sizes.

# WOOD MEDAL

We specialize in crafting distinctive, eco-friendly, and low-volume customized wood medals. Our customization options include laser engraving, UV printing, inlay, and layering, allowing us to bring any desired design to life.

# WALL PLAQUE WITH WOOD BACKING

Presenting bespoke wall plaques, ranging from A5 to A1, showcasing tailored designs on authentic hardwood backings. We use stainless steel sheet metal that give enduring elegance. Prioritizing genuine hardwood over spray-painted MDF, we ensure an authentic finish. Count on our commitment to quality craftsmanship and affordability through competitive pricing. Perfect for ceremonial use, these plaques are sure to captivate and impress at any opening ceremony.

## LAYERED WOOD PLAQUE

Embracing the latest trend in modern art, Mandala Layer Wood Art captivates with its innovative use of layered wood that give three dimensional effect. Through the use of various wood species or staining techniques, we can enhance the beauty of this layered wood style. Our commitment extends to accommodating small order quantities for personalized artistic creations.

## WOOD BASE

Additionally, we offer an exquisite selection of wood bases. Crafted from sustainable hardwoods like mahogany or teak, these bases are available in various finishes such as lacquered, opaque black, or with a staining effect, adding a touch of sophistication to your trophies. We can also add lighting feature to the wood base. Furthermore, we can also create bespoke wooden boxes to complement your unique requirements.

## 3D PRINT TROPHY (PAGE 1)

Embracing the latest trend in the trophy industry, 3D printing has become our forte since the 2020, gaining recent momentum due to its cost-effective production. Our proficiency lies in a good synergy of skilled designers, top-tier 3D printers, and skilled painters.

Unlike traditional trophies, 3D printing offers unique advantages: intricate designs with exact 3D models, eradication of mould costs, lower quantity requirements, and, in many instances, expedited production. Through expert spray painting, vibrant colours can adorn the entire 3D model. Additionally, the option of eco-friendly resin minimizes Volatile Organic Compounds (VOC).

Our capabilities extend to crafting your product, mascot, or logo with unparalleled detail and superior finishing. Adding a refined wood base further enhances the trophy's aesthetics, ensuring a striking and personalized masterpiece. Experience the innovation and finesse of 3D-printed trophies, setting new standards in design, efficiency, and environmental consciousness.

## 3D PRINT TROPHY (PAGE 2)

Throughout the years, our capabilities have evolved, enabling us to create more intricate sculptures. We have successfully overcome the limitations of 3D printing, achieving both strength and efficiency in our printing processes.

## 3D PRINT TROPHY (PAGE 3)

Our 3D printing seamlessly integrates with various materials, including metal and acrylic. Coupled with the sustainable attributes of a wooden base, I am confident it enhances the overall appeal of the trophy, bringing out its finest qualities.

BTL 3D Trophy

# METAL TROPHY

We possess the capability to fold, spray paint and print on sheet metal, creating contemporary design trophies that harmonize seamlessly with various materials like crystal, wood, or acrylic. This imparts a futuristic aesthetic to your trophy. Additionally, metal is recognized as a recyclable material, making it an eco-friendly and sustainable choice. We can do others such as tree planting plaque.

# ADVENT FRAME PLAQUE

Clients adore this particular design, which seamlessly blends a modern frame with a standout pop-up feature for logos or main themes, all crafted from stainless steel. The eye-catching effect of UV printing on stainless steel captivates attention, while the background is adorned with velvet, adding a touch of sublime elegance.

# ACRYLIC TROPHY

If you're seeking a personalized budget-friendly trophy, we offer the best cost-effective solution with modern design with our skilled designers. Also we are flexible enough to create a single piece upon customer request.

## LASER ENGRAVE/MARK/CUT SERVICE

Are you on the lookout for a cost-effective laser cutting solution? Your search ends here! We specialize in precision cutting on chrome/gold plated stainless steel (up to 1mm), acrylic (up to 20mm), gravoply, wood veneer (up to 5mm), and other materials. Moreover, our expertise includes laser engraving on a variety of materials, including wood, metal, acrylic, or gravoply, all customized to meet your specific requirements.

# UV STICKER

With this new UV technique, you can lower the cost of UV print on metal, acrylic and wood trophy. It is similar in quality and can also be applied to curved surface. In term of application, it can be said to be more accurate than direct UV print for small size product such as acrylic keychain and also be applied where UV print cannot print is over thicker or curves surfaces.

# OTHERS

Beyond the previous offerings, we can provide a diverse range of products from Indonesia.

Gift box

Leather product

Silvercraft

Wooden craft

Costume for plush bear

Tee shirt with printing

Plush toy

Small order shopping bag
